

A large, dark grey industrial vessel, possibly a submersible or a specialized transport container, is being moved on a yellow barge. The vessel has a yellow circular hatch at the front. In the background, a blue semi-truck is visible on a road, and several workers in blue uniforms and hard hats are standing near the barge. The scene is set outdoors under a clear blue sky with some clouds.

# TOGETHER FOR SAFETY

The importance of Safety, Health, the Environment and Quality is paramount to everyone within Roll Group. Every day a dedicated team of our SHE-Q specialists manage and oversee the creation, development and implementation of our business practices and audits of all corporate and project processes. We believe that we must work together with our clients to ensure that project specific risks are identified and eliminated.

Our staff are trained to the highest of standards. All employees are aware of their responsibility to take the necessary precautions to protect themselves, their colleagues, our clients, the environment and our assets. The Roll Group management systems have been assessed and certified by a notified body in accordance with ISO 9001:2015 standards and the International Safety Management (ISM) Code.

„Performing safely is our license to operate.  
We want to make sure that everyone returns to  
their family in good health at the end of the day.”

**Peter Rondhuis, CEO Roll Group**

# FROM FACTORY TO FOUNDATION

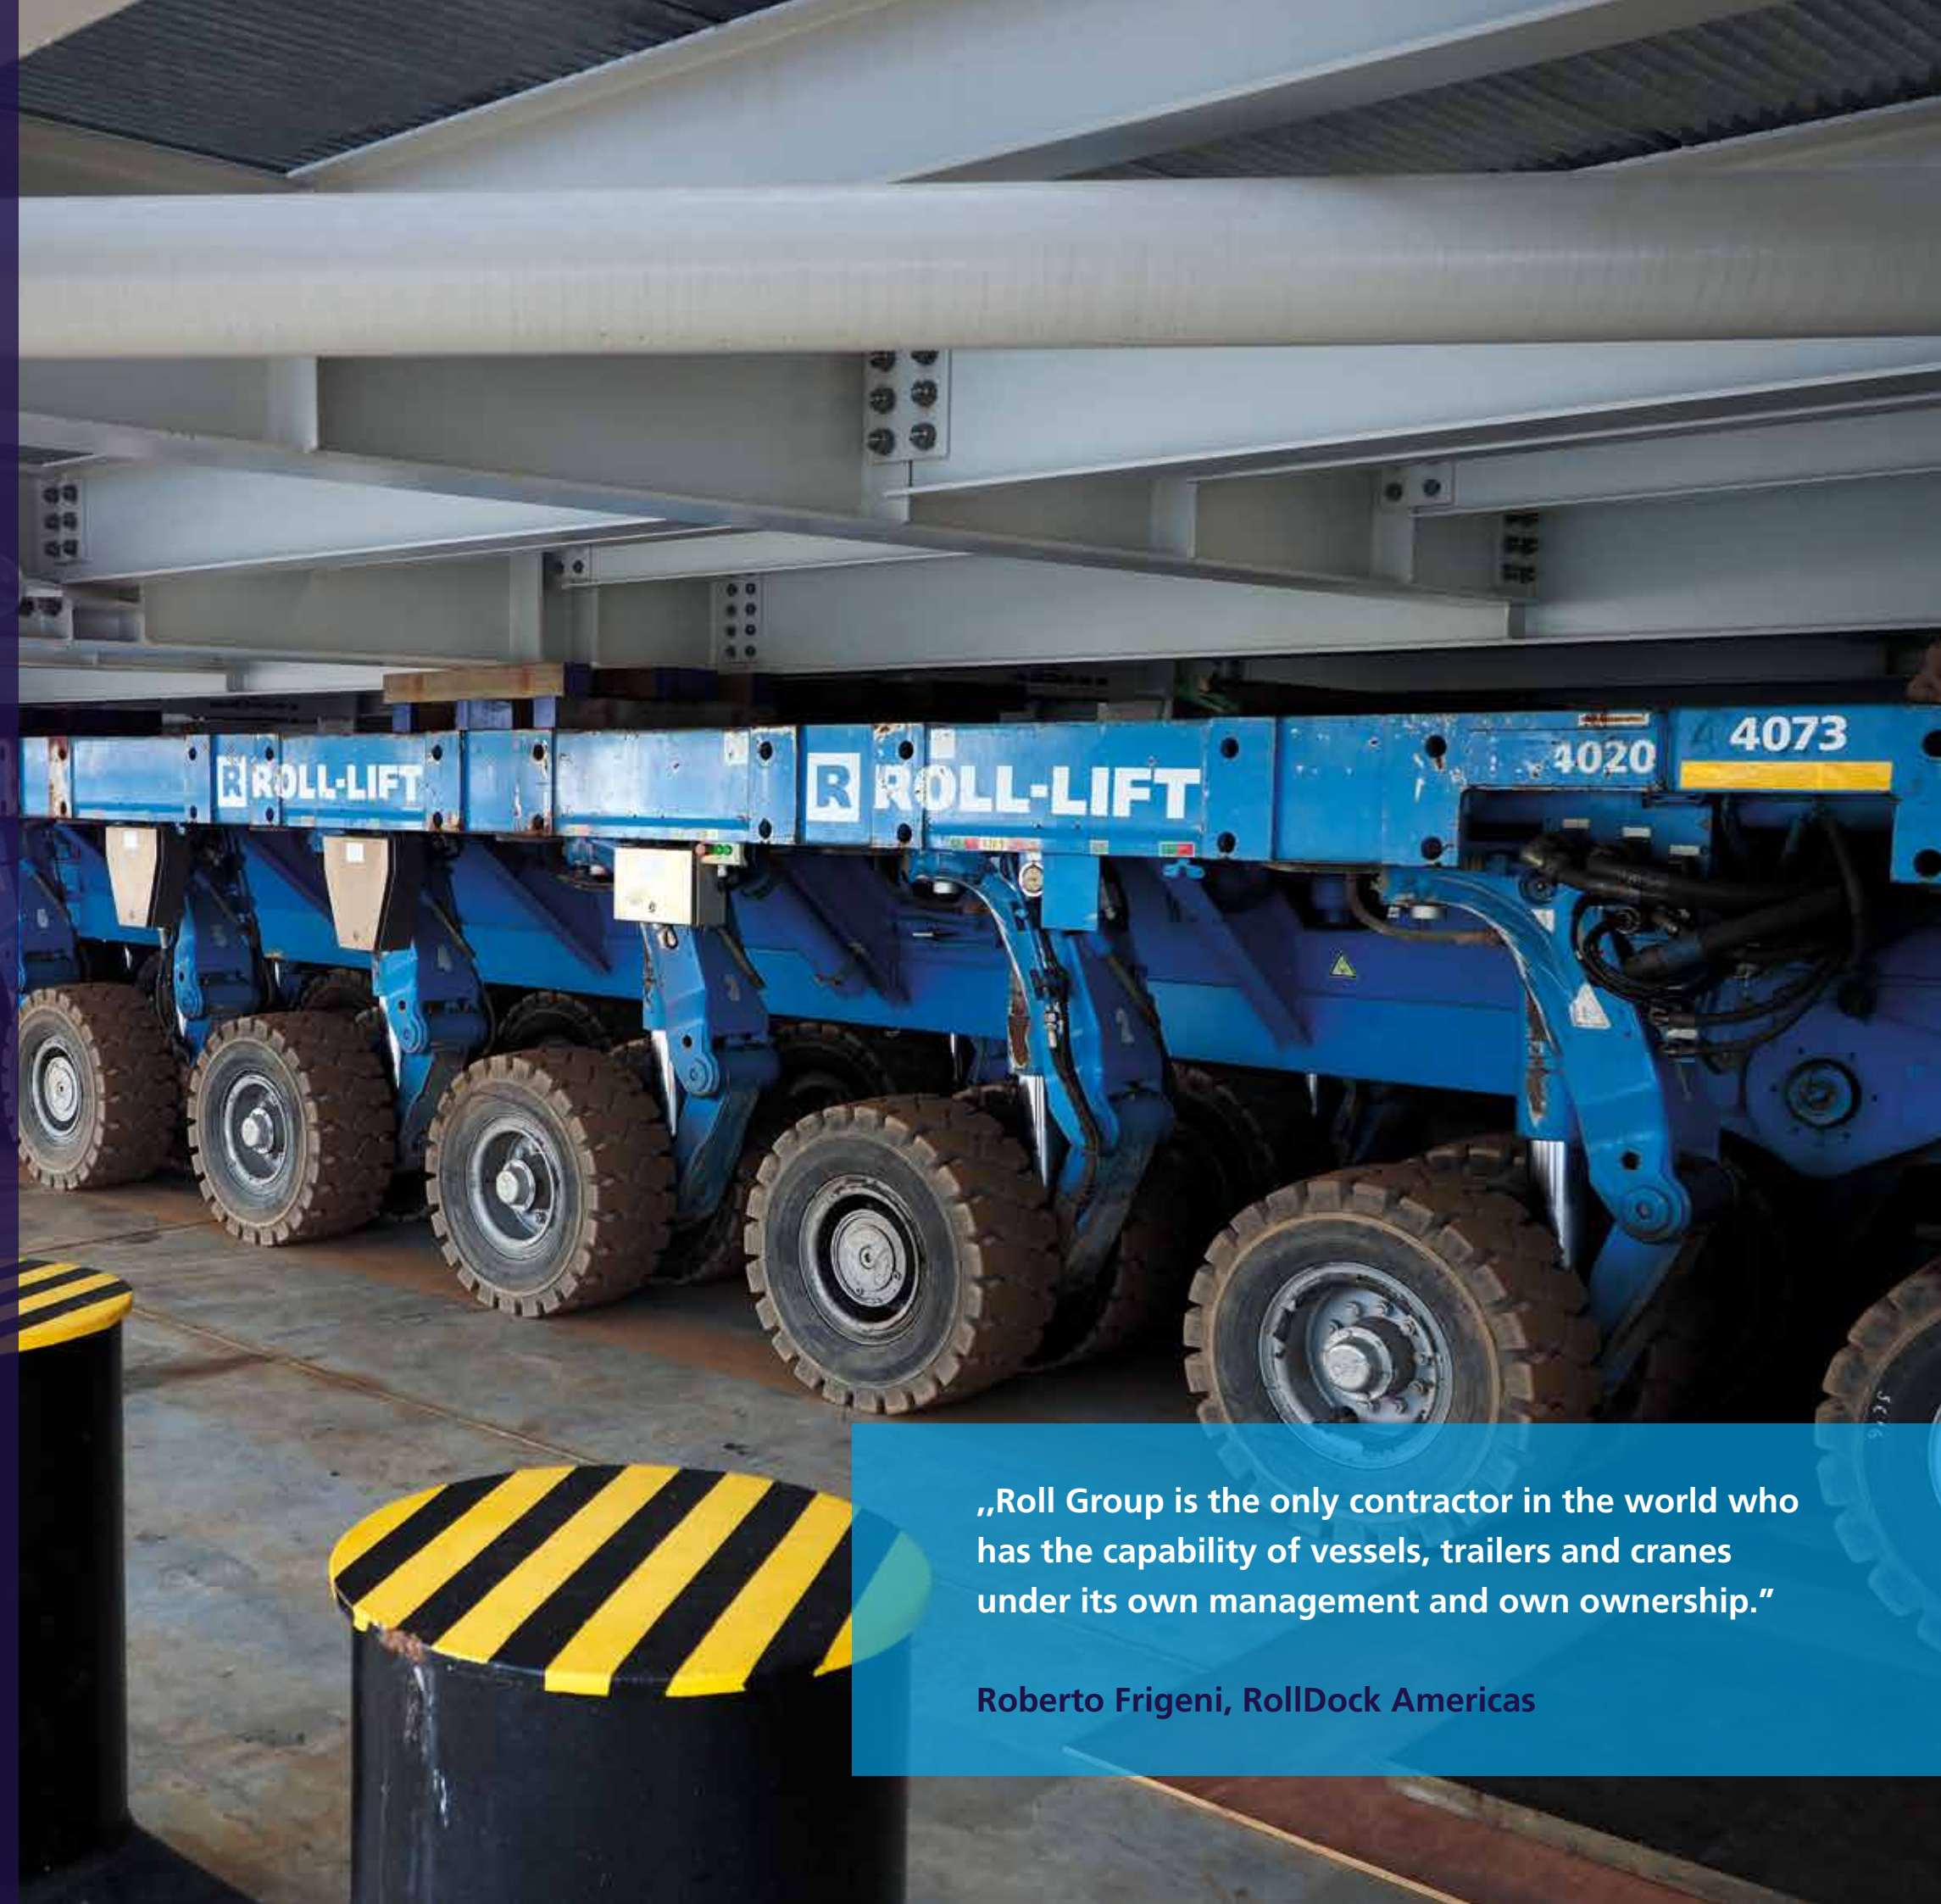

One contractor taking care of all interfaces to facilitate the movement of heavy cargo from the place of manufacturing to its final installation location. A complete 'Factory to Foundation' solution - this is what Roll Group provides.

Operating under one name, the abilities of the RollDock and Roll-Lift companies are further enhanced. Roll Group has been developing innovative engineered solutions for heavy transport, lifting and installation challenges on land and at sea since 2006.

## Engineering

Engineering is the backbone of our company. Roll Group has some of the industry's most experienced personnel who work closely with our clients to design tailor-made solutions for any situation. In combination with our state-of-the-art equipment, we perform every heavy and oversize cargo challenge with maximum safety, adaptability and efficiency.

Dealing with a single contractor brings many benefits to the project, as the entire scope of work is carried out by one party. Our unique experience and working methods ensure that developments affecting the project schedule either on land or at sea can be anticipated and managed with our fully flexible dynamic solutions, offering cost savings and a sustainable way of working.

**„Roll Group is the only contractor in the world who has the capability of vessels, trailers and cranes under its own management and own ownership.“**

**Roberto Frigeni, RollDock Americas**

**WE MOVE YOUR  
HEAVY CARGO  
SAFELY ACROSS  
THE WORLD'S OCEANS**

„Our business is technology driven. Every project starts with engineering. We have an experienced team of engineers who are able to propose the best solution to our clients.“

**Paul Hoogenhout, Project Engineer**

## BENEFITS OF OUR MODULE CARRIERS

- Highly suitable for Roll-On/Off and Skid-On/Off operations
- Completely flush deck
- DP2: installed and prepared
- Vessels suited for offshore operations
- Finnish Swedish 1A Ice Class

### BIGROLL FLEET

Module Carriers

**Classification:** Ice class 1A FS and Ice class B

**Length cargo deck space:**  
123.8 - 125 m

**Width cargo deck space:**  
32.20 - 42 m

**Deck strength:** 20 mt/m2

## BENEFITS OF OUR DOCK DESIGN

- Three loading modes: Float-In/Out; Roll-On/Off; Lift-On/Off
- Dock walls offer protection against nature's elements
- Hatch covers maximize the surface of the loading deck
- Limited cargo accelerations, due to innovative motion monitoring
- Maintenance opportunities during voyages possible

### ROLLDock FLEET

Semi-submersible heavy lift Ro-Ro multi purpose dry cargo ships

**Classification:** Ice class E2

**Length cargo hold:**  
116.20 - 119.44 m

**Width cargo hold:**  
19.00 - 19.40 m

**Deck strength:** 12 mt/m2

**Submerged draft of vessel:**  
12.50 m

**Lifting capacity deck cranes:**  
2 x 350 mt

# UNIQUE VESSELS THAT BEST SUIT THE PROJECT

The unique designs and the combination of our dock-type vessels and Module Carriers - owned and operated by Roll Group - offers unmatched multifunctionality. Due to the specific characteristics of our fleet we are ideally suited to serve a wide range of markets, such as:

- Oil & Gas
- Dredging
- Naval

- Petrochemical
- Renewable Energy
- Power
- Civil Construction
- River Cruisers and Superyachts

To ensure the safe transportation of heavy cargo across the world's oceans we place our engineering capability at the forefront of every project we undertake. Our in-house engineering department

prepares every transport with motion stability, ballasting analysis and mooring calculations.

If required, we also have the ability to design tailor-made grillage and sea fastening in order to perform every loading, transport and discharge operation with maximum safety and precision.

Roll Group has the knowledge to advise its clients on the best design options for modules, transportation solutions and preferred routings.

Our team consists of maritime experts, experienced crew and cargo superintendents. All members are dedicated professionals in a wide range of disciplines such as safety, quality, marine engineering and project management. They are involved from the earliest phase of project planning right through to the execution stage and ultimately project completion.

# OPERATING IN THE WORLD OF HEAVY CARGO MEANS TAKING RESPONSIBILITY

„Roll-Lift has been handling heavy cargo on land since 2011. The entire Roll Group - all over the world - benefit from our gained experience.“

Robin Koenis, Managing Director Roll Group APAC

# KNOWLEDGE GAINED BY EXPERIENCE AND THE RIGHT EQUIPMENT ARE KEY

Roll Group handles the lifting, transportation and installation of large, oversized and heavy structures on land. It's well known that operating in the world of heavy lifting often means overcoming challenges and taking responsibility. Roll Group fully utilizes its extensive base of experience-backed knowledge held in our first-class team of engineers, operators and supervisors ensuring we are always prepared to alleviate any possible concerns.

Every lifting, transportation and installation challenge has its own, unique characteristics. Roll Group has the in-house ability to review and consider all available solutions. Our engineers identify every obstacle, analyse all possibilities and prepare fully comprehensive documents to fulfil the requirements of our clients and any project specific parameters. With our highly manoeuvrable and adaptable equipment pool we have the ability to execute the most specialized transport and lifting challenges from concept to completion - on time, within budget and in accordance with all applicable regulations and safety standards.

## STATE-OF-THE-ART EQUIPMENT

Roll Group utilizes its own modern equipment fleet to ensure effective and efficient operations.

Our fleet consists of the following:

- Crawler cranes
- Telescopic cranes
- SPMT's
- Conventional trailers
- Jacking and skidding equipment
- Gantries

# ON LAND, AT SEA. WE ARE WHERE YOU NEED US.

Our clients benefit from global representation with a worldwide network of Roll Group offices and agents. The main Roll Group offices are located in Rotterdam, Houston and Singapore so our experts are positioned in the world's most important hubs and easily accessible.

Due to strategic partnerships Roll Group ensures total project execution and guarantees a better utilization of our vessels resulting in a reduced environmental footprint.

The 'Factory to Foundation' solution provided by Roll Group knows no boundaries. We can reach any location on earth - carrying heavy cargo on land and at sea - in the most efficient and safe way possible.

**„Our unique know-how is not limited to the Netherlands, where it all started. We can count on the industry's best professionals all over the world.“**

**Peter Rondhuis, CEO Roll Group**

# PEOPLE ARE OUR MOST VALUABLE ASSET

If you take a look at the equipment owned by Roll Group - the vessels, cranes, SPMT's and trailers - it would be easy to think that this state-of-the-art asset base is the strength of our company. But behind the impressive equipment list is our most valuable hidden asset: Our People.

The most valuable work in the world of heavy cargo is that which is carried out by our employees. Without our people, nothing would be transported, lifted or installed. Whether it's the preparation prior to the project or the safe and effective implementation of the work - our people are responsible for successful accomplishments time and time again. At Roll Group, we are proud that we can rely on our client focused team of experts who are always willing to go that extra mile. By working closely with our clients and thinking outside the box, our services are always efficient and on time.

It's all about the team, and we are very aware of this fact. That's why we do our utmost to be and remain a great place to work. Personal development plays a key factor in this, so we motivate our people to step outside their comfort zones and encourage everyone to learn new skills. Our people are motivated most by the will to develop to the next level which is beneficial not only to themselves but also our stakeholders.

## Core values

We're proud that the following core values - CREST - emerged from sessions with colleagues from all levels of our organization:

CARE	- We take utmost care and put safety first
RELIABLE	- We perform to the possible highest standards
ENGAGEMENT	- We are committed, energetic and focussed
SOLUTION DRIVEN	- Mentality; improve and offer flexible solutions
TOGETHER	- We know how

The mindset of our people is essential to the execution of our mission - that Roll Group is recognized by its clients as the best service provider of complete project solutions. We will provide effective, innovative and sustainable heavy lift and transportation services on land and at sea using our unique experience-backed know how. Our core values - fully supported by our people - help us to continually perform at the highest level.

**"When managing and taking an involvement in the vessel based phase of a project it becomes clear that working in the heavy cargo industry requires experience-based knowledge, a specific type of character and a can-do / hands-on mentality. I see a combination of these factors on a day to day basis and it fills me with satisfaction and pride to be a member of such a formidable team."**

**Peter Hollander, Captain**

# SAVING THE PLANET IS OUR MUTUAL RESPONSIBILITY

At Roll Group we care about our planet. It is our mutual responsibility to protect nature and preserve it for our future generations. However it's an unfortunate fact that the world of heavy lifting and specialist transport is not yet one of the most sustainable industries - but that doesn't mean we don't do everything we can to perform our work in the most environmentally friendly way possible.

Shipping is one of the largest polluters in our industry, so it makes sense that we take the biggest steps here. The decision to switch our entire fleet to low sulphur marine fuel was a clear one, as it's the best way to reduce our environmental footprint. But that's not all - we always maintain a close eye on technological developments and innovations within our industry as we have the ambition to make the transition to a fuel which is even more environmentally friendly as soon as possible.

In addition to our choice of fuel our vessels have also been equipped with fuel consumption monitoring instruments to enable us to scrutinize and improve our fuel economy, and we are also looking at the benefits of low friction anti-fouling, wake equalizing ducts and waste heat recovery units.

## Small initiatives do contribute

These changes have a large impact, but we are also implementing a number of 'quick fix' solutions. One such solution is making tap drinking water available on our vessels, to eradicate the use of plastic pet bottles onboard. And now when we hit the road, we prefer to do it powered by electricity with the majority of the Roll Group car park now electric.

All great initiatives, but it's only the beginning! Nature deserves our daily attention, and everyone within Roll Group - especially our sustainability working group - continues to look for new methods of changing our behaviour in such a way that we have as little impact on our environment as possible. With that goal in mind we want to further expand and optimize our communication with clients about the possibilities and savings through slow steaming. Roll Group is confident that by working together with our clients and suppliers we know how to play our part in contributing to a better environment for us all.

**“Our business uses the planet. It’s therefore our responsibility to work in the most sustainable and efficient way so that future generations can also have access to its natural resources.”**
